

Rules of the Road

1. Ride your bike on the right side of the road with the flow of traffic.
2. Stop at STOP signs and obey traffic signal lights.
3. Signal for turns and utilize turn lanes when available.
4. Use a headlight and tail light for night travel.
5. Children under 16 years old are required to wear a helmet.

CITYFACT

Only 56% of Miami Beach residents drive a vehicle, while the rest either walk, bike, take mass transit or other alternative means for their transportation needs.

DIDYOUKNOW?

Riding a bicycle has many health, economical, and environmental benefits. Bicycling at least three hours per week can cut in half your risk for chronic diseases such as heart disease and stroke, keeping you healthy and in shape. You will also save money, since operating a bike for one year costs on average only \$120, rather than the \$5,170 it will cost you to operate a car. A cleaner environment is another bonus that will be inherited by generations to come. Every gallon of gas you save prevents 20 pounds of CO₂ from being emitted into the air, which helps to reduce the local air pollutants that are responsible for many breathing diseases. So choose your bike- it is good for your health, your pocketbook, and your environment.
